Client Reference	Location	Description

Samples will be analysed in accordance with in-house Test Method SOP 09 based on HSG 248 Asbestos: The Analyst Guide Edition 2.  
 Denas Analytical cannot be held responsible for the sampling methods used by the client.

When submitting samples please ensure:

- Samples are double bagged and sealed securely.
- Sample appropriately.
- Clearly label and identify each sample, clearly label the inner bag if visible through the outer bag. Alternatively, clearly label both bags.
- Please complete a sample submission form with each batch of samples.
- Please ensure information on the sample bags coincide with information provided on this form.
- If more than 13 samples are submitted, please fill in a separate form with the correct page numbering found at the bottom of this form.
